

Olympiad Examination Council

Let's go NASA 

International Space Olympiad

About ISO

The Olympiad Examination Council conducts the International Space Olympiad (ISO) to ignite curiosity and promote knowledge about space science, space geography and astronomy among students from Grade 5 to Grade 10. This unique Olympiad is designed for young learners who are fascinated by the universe and eager to explore the mysteries of space through scientific thinking and discovery.

Golden Chance to Win Scholarship

Examination Marking Scheme

Part	Questions
Space Science	25
Space Geography	25

Eligibility

Grade 5 to Grade 10

Examination Pattern

The question paper consists of two parts:

Part-1: Space Science

Part-2: Space Geography

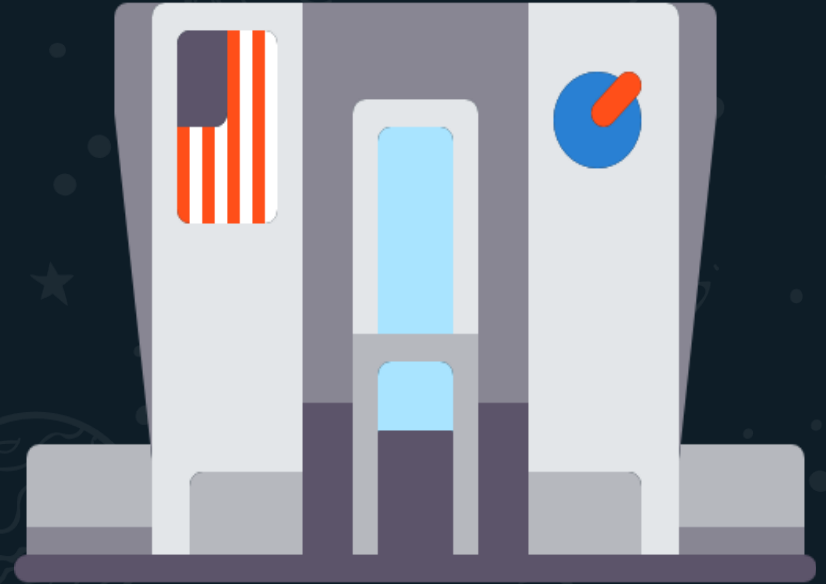

Curriculum

Olympiad Examination Council. The council curriculum is completely based on school curriculum and all this curriculum has been prepared according to national and international boards.

Let's go NASA

The **Olympiad Examination Council (OEC) “Let’s Go NASA” Scholarship** is an exclusive initiative designed to inspire young minds passionate about space science and technology. This scholarship supports meritorious students who excel in OEC’s space and science Olympiads, offering them a once-in-a-lifetime opportunity to engage with NASA’s educational and research programs. It aims to encourage innovation, critical thinking, and global exposure among future scientists and engineers. By covering travel, training, and learning costs, the scholarship ensures that talented students — regardless of their financial background — can experience advanced learning and international collaboration in the field of space exploration.
